

# GrantLaunch

*Simplify Research Administration Processes to Make Better Decisions Faster*

## What is GrantLaunch?

- GrantLaunch (Kuali Research) electronically routes grant proposals for university approval.
- Provides access to reporting & document tracking.
- This software was implemented to help simplify research administration processes after Bizflow was discontinued.

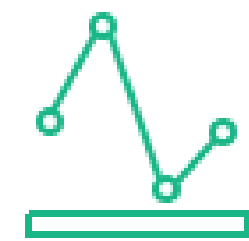

Proposal + budget development

Grants.gov S2S submission

Negotiations and sub-awards

Award tracking + reporting

## What Can We Do With It?

- Develop Project Information Forms (PIF) more efficiently with intelligent routing and approval
- Manage contract & associated agreement negotiations more effectively for faster awarding and better visibility
- Effectively and Efficiently automates and provides data to faculty and administrators.

## GrantLaunch Supports...

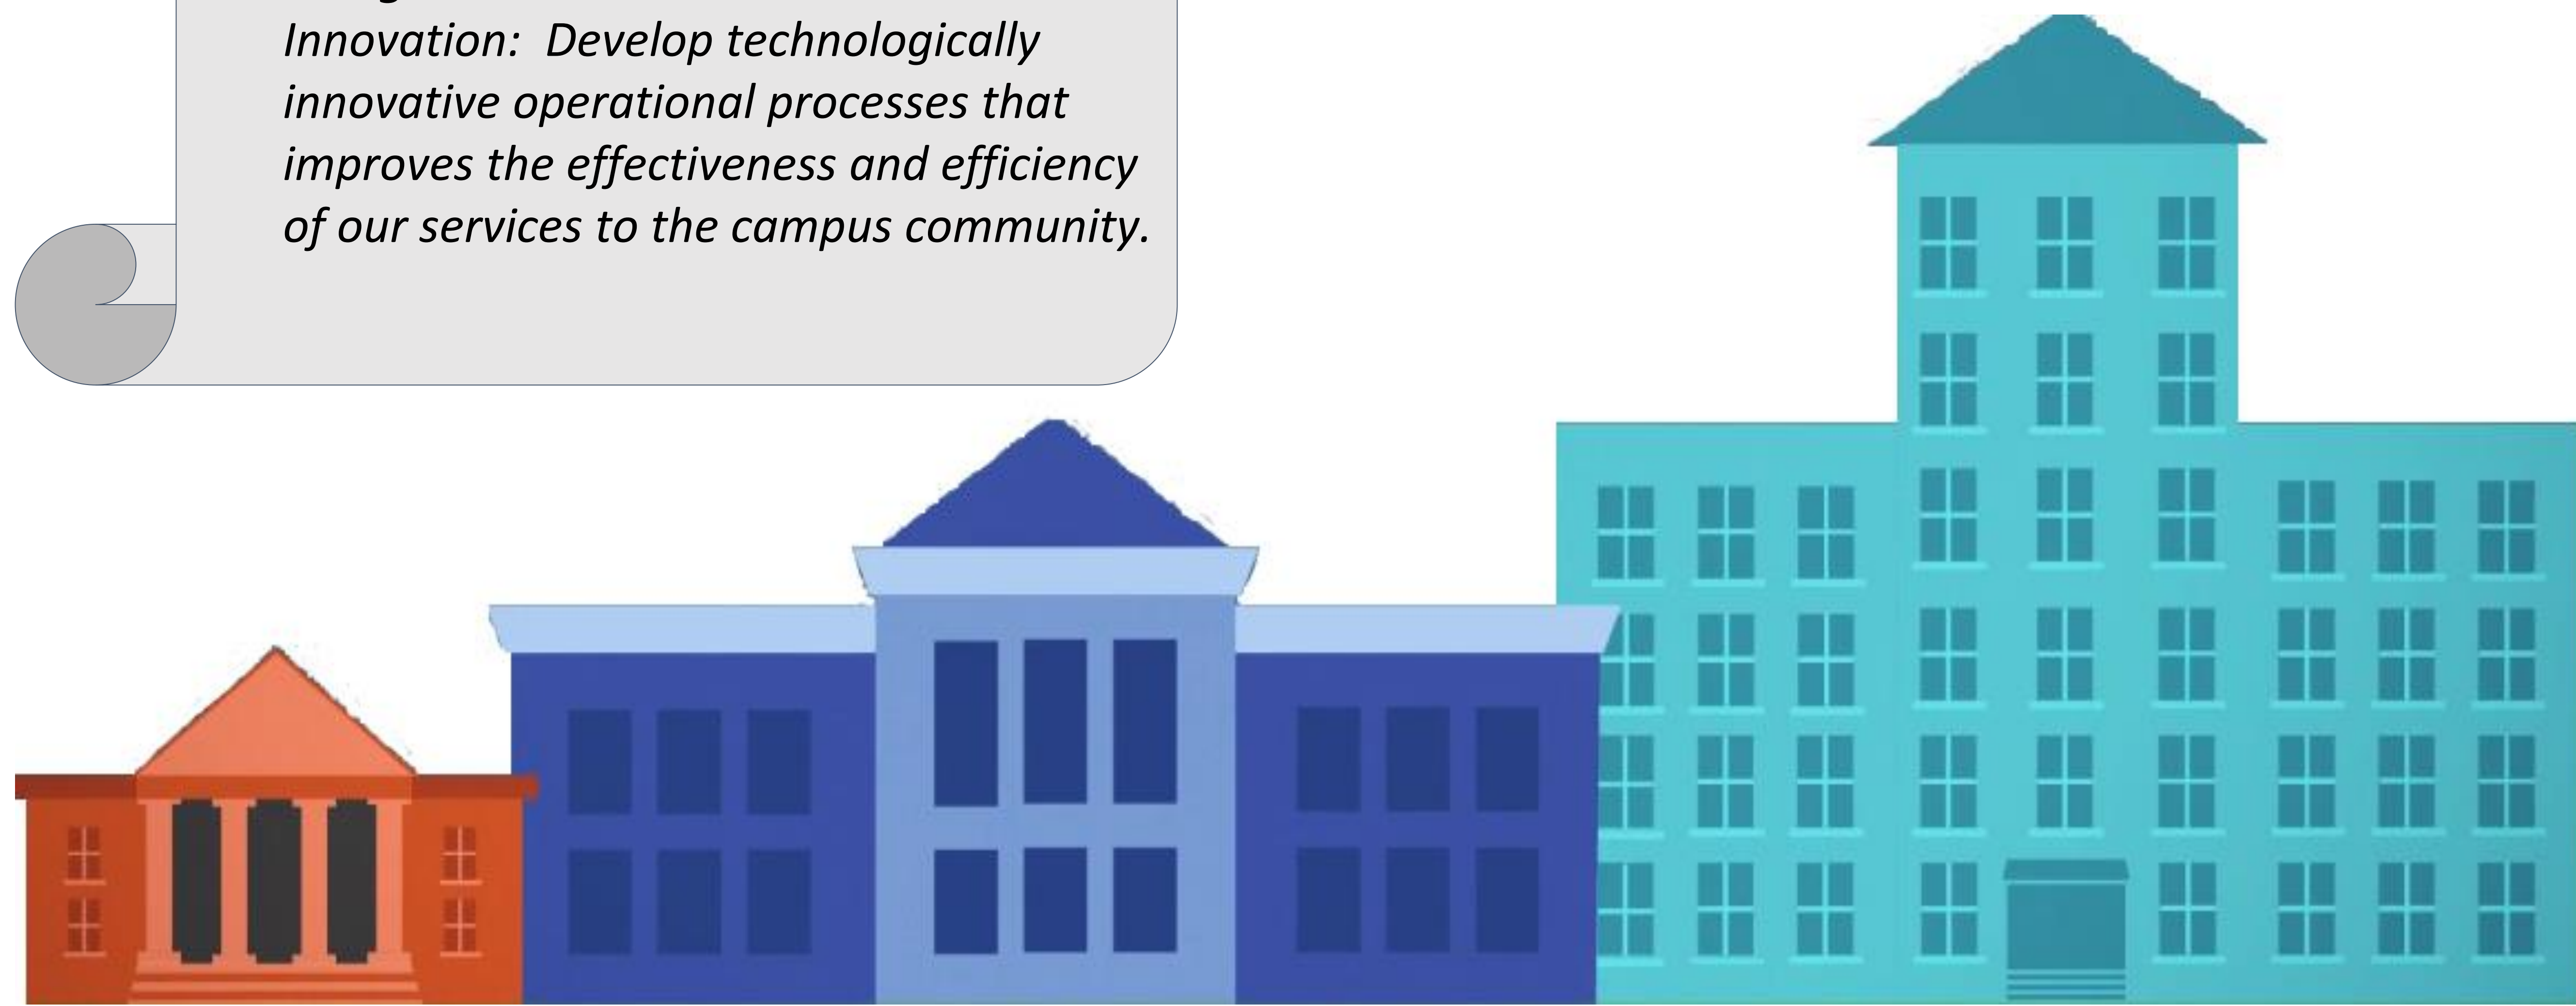

- **Fresno State's Strategic Plan to:**  
*Grow and develop collaborative and engaged community partnerships to increase support for students and the university.*

*And*

- **Division of Research and Graduate Studies Strategic Goal:**  
*Innovation: Develop technologically innovative operational processes that improves the effectiveness and efficiency of our services to the campus community.*

## "Negotiations?" What is That?

- "Negotiations" is a component of GrantLaunch that allows us to track the negotiation of a contract electronically.
- More than 75% of awarded projects are contracts at Fresno State.
- Post-Award Analysts, Fresno State Budget Analysts, General Counsel and Grant Managers have the ability to electronically access "negotiations" documents.
