

Dear Colleagues:

This afternoon the Central Utility Plant Replacement contractor inadvertently hit an electrical conduit. Unfortunately, this has resulted in the loss of our building control system for several buildings.

The good news is that all of our electrical and heating systems are operational. However, many buildings are connected to the control panel that has been impacted. If you experience a change in temperature in your office or classroom tomorrow, please reach out to Meredith Booey Sandrik at mbooey@csufresno.edu. Please be advised that the contractor is working closely with our Facilities Management team to ensure we get this repair completed as quickly as possible. We will provide an update when we have more information.

In the meantime, if you have any questions, please contact Facilities Management at 559.278.2373 or email Meredith Sandrik at mbooey@mail.fresnostate.edu.

Sincerely,

Tinnah Medina Associate Vice President for Facilities Management
