

Dear Campus Community,

The Central Utility Plant Replacement (CUPR) project's solar photovoltaic (PV) installation is making progress. As [shared](#) earlier this semester, this work will occur in phases throughout the calendar year, and the next phase, which started last Friday, will move further into parking lot [P5](#).

ADA parking is available between lots [P5 and P6](#) as indicated in blue.

Alternative parking is available in lot P6 and the Save Mart Center parking lot. Traffic Operations continues to provide a limited [shuttle service](#) to assist pedestrians who park in the Save Mart Center parking lot.

In addition to providing shade for 1,500 parked cars, the PV canopies will generate 4.5 MW of electricity during peak hours and reduce the campus' reliance on the electrical grid.

Additional Resources:

- For up-to-date ADA pedestrian paths of travel during this project, be sure to access the interactive [map](#) available on the Facilities Management website or the Fresno State [Mobile App](#).
- Contact Meredith Sandrik at mbooe@mail.fresnostate.edu or call Facilities Management at 559.278.2373 if you have any questions. Feedback can also be provided [here](#).

To learn more about the CUPR project and related benefits, including sustainability and energy conservation, click [here](#).

Sincerely,

Tinnah Medina Associate Vice President for Facilities Management
