

Dear Colleagues:

As part of the Central Utility Plant Replacement (CUPR) Project, a contractor will be working north of the Ag Mechanics building. Please find a graphic representation in our interactive map [here](#). (You may have to zoom to the Ag Mechanics building to hone in on the affected area.)

Impacts:

- The lot north of the Ag Mechanics building will be a construction zone while work is being completed.
- There may be intermittent noise and vibration disruptions from jackhammering.
- There will be construction traffic on San Ramon with flaggers guiding vehicles as needed.
- We will coordinate with the contractor to ensure an available path of travel near the Ag Mechanics building.

Questions/Concerns?

Please share with any fellow colleagues or students who would benefit from receiving these updates.

The contractor team wears proper identification and will be working in accordance with federal, state and local safety and environmental regulations. More information on the work for the buildings is available [here](#). Please contact Facilities Management at 278-2373 if you have questions. We appreciate your feedback on the CUPR project - please submit any concerns [here](#).

Visit our [website](#) to learn more about the benefits of the CUPR project.

Sincerely,

[Facilities Management](#)
