

Colleagues:

Facilities Management has been made aware of heating issues. We are working with a contractor to mitigate elevated temperatures in the following buildings:

- Family, Food and Science
- McKee Fisk
- Science 1
- Social Science

We have a manual, temporary fix in place to keep occupants comfortable while we address the temperature issue.

If you continue to experience temperature concerns, please reach out to Meredith Sandrik at mbooe@mail.fresnostate.edu and, if possible, specify the impacted rooms(s) so we can isolate the issue in your building.

Questions/Concerns?

Please share with any fellow colleagues or students who would benefit from receiving these updates.

The contractor team wears proper identification and will be working in accordance with federal, state and local safety and environmental regulations. More information on the work for the buildings is available [here](#). Please contact Meredith Sandrik at mbooe@mail.fresnostate.edu if you have questions. We appreciate your feedback on the CUPR project - please submit any concerns [here](#).

Visit our [website](#) to learn more about the benefits of the CUPR project.

Sincerely,

[Facilities
Management](#)
