

7/12/22

Colleagues:

As part of the Central Utility Plant Replacement (CUPR) Project, a contractor will perform work on the existing hot water pipeline to prepare for ventilation system upgrades in **University High School**. This work will **not** impact the operation of sinks, water faucets, restroom facilities, or eyewashes and safety showers.

Potential Impacts:

There will be contractor presence in the University High School building starting this week.

Questions/Concerns?

The contractor team wears proper identification and will be working in accordance with federal, state, and local safety and environmental regulations.

Please call the Service Center at 278-2373 if you have questions or concerns. We appreciate your patience in support of this capital improvement. Please submit any feedback [here](#).

Sincerely,

Facilities Management
