

08/24/2022

Colleagues:

As part of the Central Utility Plant Replacement Project (CUPR), several buildings are undergoing upgrades to their HVAC controls. During this time, there may be temperature fluctuations associated with the work.

We ask that you utilize the concerns log provided [here](#) in order to report temperature or airflow issues in your respective buildings so that a solution may be expedited.

Potential Impacts:

The following buildings are undergoing upgrades to their HVAC controls:

**Engineering East
Speech Arts
Family Food & Science
McKee Fisk
Engineering West
Grosse Industrial Technology**

Questions/Concerns?

This will help us expedite these issues in the most effective way possible. Please call the Facilities Management Service Center with questions or concerns. Find out more about the project and its benefits [here](#).

Sincerely,

Facilities Management
