

8/10/22

Dear Campus Community,

We are currently undergoing upgrades to HVAC building temperature controls in several buildings including: Engineering East, Speech Arts, Family Food Science, McKee Fisk, Engineering West and Grosse Industrial Technology. Unfortunately, this work is temporarily impacting our ability to address temperature fluctuations, resulting in uncomfortable building conditions.

In order to address this temporary condition, Facilities Management has secured the services of a local mechanical contractor to provide temporary cooling by utilizing chillers on semi-trucks, which will provide supplemental cooling for each affected building. We anticipate these measures to be in place as soon as possible.

We apologize for this inconvenience and appreciate your patience while work is being conducted. Please contact the Facilities Management Service Center at 559.278.2373 if you have any questions. Feedback or concerns can also be submitted [here](#).

Please learn more about the Central Utility Plant Replacement project and the benefits including sustainability and energy conservation [here](#).

Kind Regards,

Tinnah Medina
Associate Vice President for Facilities Management
