

Add horizontal crosswalks to allow individuals to cross diagonally on Maple, near Joyal, and to the Rec Center.

CURRENT CHALLENGE:

The crosswalks get congested and unsafe before peak class times--while increasing traffic problems. This particularly happens on Maple (near the Kremen School, University High, and Joyal); and the crosswalks that are located from Joyal to the Student Recreation Center.

PROPOSED SOLUTION:

Add horizontal crosswalks to allow individuals to cross diagonally as opposed to twice (from one side then to another).

BENEFITS TO FRESNO STATE:

Allows students to walk to their destinations quicker and safer.
Reduces traffic problems..
